

## Environmental & Safety Policy

Polypreen Belgium is a leading company in the development and production of high-quality polyurethane foams and sleeping comfort including high-quality mattresses and box springs. Our main business scope is set on the European market (Belgium, the Netherlands, Denmark, Germany, France, etc.).

Polypreen Belgium wants to keep distinguishing itself on the market as a quality player by continuously improving the quality of our products and processes, but also by implementing improvements in the field of environment and safety. Polypreen Belgium has been using an ISO 14001 management system for 20 years and maintains, within the Seveso Cooperation Agreement, a strong prevention policy.

Polypreen Belgium has a substantial solar panel park in order to use self-produced green energy in its production processes. Being a member of the Valumat initiative, enables both Polypreen Belgium and its customers to recycle used mattresses and thus improving their environmental impact.

Environmental and safety management are essential to ensure the continuity and improvement of Polypreen Belgium.

Polypreen Belgium complies with the environmental and safety requirements imposed by the authorities and the standard requirements of the ISO 14001 standard. Polypreen also takes into account the requirements and expectations of its other stakeholders (sectoral bodies, customers, suppliers, ...).

Polypreen Belgium is committed to setting, maintaining and continuously improving its environmental and safety objectives. These include:

- Optimisation and reduction of *energy consumption*, if possible;
- Limitation and/or prevention of *water consumption and pollution*;
- Prevention of *soil and air pollution*;
- Reducing its environmental impact by *recycling waste and residual products*;
- Implementing *circular economy* in its processes, if possible;
- Reducing its *CO<sub>2</sub> footprint*;
- Ensuring the *well-being and safety* of its employees and the environment;
- *Continuously improving its processes* with regard to quality, safety and the environment.
